Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

CLAIMS 1-30 ARE PRESENTED FOR EXAMINATION

Applicant's election of Group I, claims 1-10, in Paper No. 8 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim 1 is presented as a method of effecting anti-hypertensive action, whereas claims 2-10 are drawn as to a composition. During telephone interview with attorney Dennis P. Clarke on November 10, 2003 the examiner was advised that the claims were to be examined as composition claims in accordance with the original restriction requirement of mailed June 20, 2003.

Therefore, claims 1-10 are examined as composition claims and claims 11-30 are withdrawn from consideration.

DETAILED ACTION***Claim Objections***

Claims 2-10 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 2-10 do not further limit claim 1 since claim 1 recites R and R¹ are both ethyl. In claims 5 and 6 R and R¹ are defined as alkyl and aralkyl, in claims 5, 7, 9 and 10 these radicals are defined as methyl, propyl and benzyl radicals. Each of these radicals do not further limit claim 1.

Claim 2 recites n is 3 and m is 4 which does not further limit claim 1. Similarly, claim 4 defines m and n as 4.

Claims 3 is deemed redundant since it defines m and n as 3 which is the definition set forth in claim 1.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-10 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 5,455,2377. This is a double patenting rejection.

The examiner believes that there is a common assignee of the application although the inventors are different. It is to be noted that the typed name on the declaration identifies the inventor as Jr. However, the signature lacks Jr. Clarification, for the record is requested.

The preamble of the present claims have not been given any weight.

None of the claims are allowed.
